

## Agriculture: Then & Now

1. List (in point-form) some of the issues that farmers in B.C. have to deal with each year. What can hurt their crops?

## Videos: Agriculture Today

*Watch the videos and write some notes about what the industrial farming system is like vs. sustainable farming.*

Industrial Farming System	Sustainable Farming

## Farming Cartoon Assignment

**TASK:** Take a blank piece of paper and draw a line down the middle (up-down, side-to-side, or diagonal—you choose!). Label one side “The 1800s” and label the other side “Today.” Your job is to draw a cartoon of what farming life was like back then and now. Think about some similarities but also what is different. What did they use to plant seeds or harvest crops back then? What about today? You can put whatever you want in the cartoon (including thought/speech-bubbles), just as long as you show your learning from the textbook and how that compares to life today.
