

**Causes of the Industrial Revolution**

*Causes of the Industrial Revolution*

**Instructions:**

1. Draw a line between any factors that you think were connected at the time. Some connections have already been done for you. For example, the Agricultural Revolution created cheap food. Because there was more cheap food, the population rose.
2. Explain any **two** connections that you have drawn.
3. Explain why the factors marked with a star \* on the diagram were needed for an industrial revolution to happen.
4. **Option 1:** Choose one of the factors and explain why it was the most important factor in causing the Industrial Revolution.  
OR  
**Option 2:** Explain fully why it is impossible to choose any one factor to be the most important in causing the Industrial Revolution.
