

# Regions of Canada Station

A region is an area that has unifying characteristics. Regions help us understand why areas are similar or different to other areas. You have probably heard of “the coast,” “the prairies” or “the Caribbean.” You may have a clear image of these regions.

## Task:

Use pages 28-31 in your *Student Workbook*, and pages 99-101 in your *Horizons* textbook to help you fill in the Regions of Canada Chart provided.
